Professional Profile

Systems Engineer with over 6 years of experience in software development and quality assurance. Expert in requirements validation, design, and execution of functional, regression, and integration tests in agile environments. Strong background in IBM i AS400 and QA for enterprise and eCommerce solutions. Skilled in automation with Selenium, RestAssured, Postman, and SQL, as well as defect management using Jira and Confluence. Certified in agile methodologies and passionate about ensuring reliability and quality in technology deliverables.

Professional Experience

BAC Credomatic LATAM – Programmer Analyst 1 (IBM i AS400)

May 2022 – Present

- Designed and executed functional and regression tests for critical payment applications (POS, ATM, acquiring, issuers).
- Migrated legacy systems to modern environments with embedded SQL and microservices.
- Managed defects and QA documentation aligned with international standards.
- Key Project: Dynamic Currency Conversion (DCC), enabling local currency payments and increasing projected revenues by 25%.

Grupo Babel – Programmer and QA Testing

2020 – 2022

- Designed test cases, executed manual and automated testing, documented in Confluence, and managed defects in Jira.
- Developed solutions in .NET, SQL Server, SharePoint, Power Apps, and Power Automate.
- QA testing and application support for clients such as SUTEL and BCIE.
- Key Project: Performance evaluation system for BCIE with automation and report validation.

NG Technology / ASOPROLESA – Programmer and ORM Support

2020

- Validated requirements and performed functional testing for inventory systems using PHP, JavaScript, and MySQL.
- Implemented and supported applications in Linux environments.
- Freelance Project: CRUD in Laravel with technical manual and user training.

Education

- Bachelor's in Information Systems Engineering – Universidad Nacional de Costa Rica (2020)
- Associate Degree in Information Systems Engineering – Universidad Nacional de Costa Rica (2019)
- High School Diploma – Liceo Académico La Virgen (2013)

Certifications

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Scrum Foundation Professional Certificate (CertiProf, 2020)
- Six Sigma Yellow Belt Professional (6sigmastudy, 2020)
- Udemy: RPGLE Modernization with VS Code
- Udemy: Advanced RPG Full Free with SQL and SDA

Technical Skills

- QA & Testing: Selenium, RestAssured, Postman, Jira, Confluence, manual QA, regression, integration, and performance testing.
- Languages & Frameworks: RPGLE, C#, .NET Core, PHP, React, Java, Python, Node.js.
- Databases: SQL Server, Oracle, MySQL, PostgreSQL.
- Infrastructure: Windows Server, Linux Red Hat, Cloud Migration, AWS (desired).
- Methodologies: Agile/Scrum, QA Testing, technical documentation.

Languages

- Spanish: Native
- English: A1 (in continuous improvement)

Key Achievements

- Ensured quality in critical payment applications across LATAM.
- Designed and executed functional and regression tests in digital banking.
- Implemented QA processes with traceability between requirements, test cases, and defects.
- Automated testing and API validation with Postman and Selenium.
- Certified in agile methodologies applied to continuous improvement projects.
