Professional Summary

Systems Engineer with 6+ years of experience in software development and systems analysis, specialized in Full Stack solutions and IBM i AS400 (RPG/RPGLE) modernization. Proven expertise in critical payment systems, digital banking, and fintech solutions, ensuring compliance with PCI DSS, ISO 8583, EMV standards. Skilled in SQL optimization, backend/frontend development, and agile methodologies (Scrum). Passionate about scalable, secure, and innovative solutions bridging legacy and modern technologies.

Core Competencies

- Programming Languages: RPGLE (Expert), Java, Python, PHP, JavaScript, TypeScript, Node.js, C#, .NET, Angular
- Databases: Oracle, SQL Server, MySQL, PostgreSQL
- Cloud & Platforms: Microsoft Azure (AZ-900 Certified), Power Platform (Power Apps, Power Automate, Power BI), SharePoint
- Tools & DevOps: Git, GitHub, GitLab, VS Code, XAMPP, Workbench
- Methodologies: Scrum, QA Testing, Continuous Improvement (Six Sigma)
- Protocols & Standards: TCP/IP, ISO 8583, PCI DSS, EMV

Professional Experience

BAC Credomatic LATAM | Systems Analyst & Developer – IBM i AS400

May 2022 – Apr 2026

- Designed and optimized backend and frontend applications in RPGLE and SQL for high-volume financial transactions (Visa, MasterCard, Amex).
- Led the Dynamic Currency Conversion (DCC) project, enabling multi-currency payment options for customers.
- Implemented regulatory compliance updates for international card brands, integrating RPGUnit testing for QA coverage.
- Modernized payment systems architecture, ensuring scalability, resilience, and compliance with global standards.

Grupo Babel | Software Developer & Estimation Analyst

2020 – 2022

- Delivered enterprise solutions for SUTEL, BCIE, BAC, leveraging SharePoint, Power Apps, Power Automate, SQL Server, .NET.
- Conducted requirements gathering, QA testing, technical documentation, and production deployment.
- Designed and implemented workflow automation improving operational efficiency.

NG Technology / ASOPROLESA | Software Developer & ORM Support

2020

- Built inventory management systems (internal/external) using PHP, JavaScript, MySQL, GitLab.
- Enhanced ORM functionalities and provided technical support.

Freelance Projects | Full Stack Developer

2018 – Present

- Developed web and desktop applications in Java (JSP, Servlets, Hibernate), Python (Flask), PHP (Laravel).
- Created CRUD systems, inventory control apps, and delivered user manuals & client training.
- Modernized legacy applications with responsive design and secure coding practices.

Education

- Bachelor's in Information Systems Engineering – Universidad Nacional de Costa Rica (2020)
- Diploma in Information Systems Engineering – Universidad Nacional de Costa Rica (2019)
- High School Diploma – Liceo Académico La Virgen (2013)

Certifications

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Scrum Foundation Professional Certificate – CertiProf (2020)
- Six Sigma Yellow Belt Professional – 6sigmastudy (2020)
- Advanced RPGLE Modernization with VS Code – Udemy
- RPG Full Free with SQL & SDA – Udemy

Languages

- Spanish: Native
- English: Intermediate (Reading 40%, Writing/Speaking 30%) → Currently improving towards B2 level

Key Achievements

- 4 years developing critical payment applications at BAC Credomatic LATAM.
- Successfully migrated legacy systems to modern environments, improving performance and compliance.
- Delivered digital banking solutions for BAC and BCIE, aligned with international security standards.
- Applied Scrum and Six Sigma methodologies to drive continuous improvement in software delivery.

ATS Optimization for 2026:

- Structured with clear sections and recruiter-friendly keywords.
- Highlighted quantifiable achievements and impact-driven results.
- Removed unnecessary personal data (DOB, nationality).
- Balanced legacy expertise (AS400) with modern technologies (Cloud, DevOps, Full Stack).
